95% confidence, 90, 67 ???

We strive for NORMALITY
We wish for average

Biochemical Individuality

Roger Williams, U. of Texas Pr.
~ 25 Years Ago.

Modern medicine — health care
treats us as
average
normal — or abnormal
Average dose — doesn't "work"
try another
Your pharmacologic baseline?
Your personal normality?

People know they're different
know about mental state &
health — nutrition — ...

⇒ Alternative medicine:

food supplements / vitamins / herbs / ...

Modern medicine — in USA — only beginning
to understand.

Why? \$ — red ink — costs

clinical tests, "diagnostics"

"Confirm a diagnosis": Diagnostic hypotheses

"Screen" IF ... : "shotgun"

Cost/Benefit ratio

Health Care Costs ↓ ⇒ C/B ↓ C ↓ B ↑

Example: Type II Diabetes
7-15% of 260 Million 1/2 un diagnosed
10-15 M people → complications of
unmtd diabetes?
